Earn Cash by Referring a Friend or Business Associate!

Friendly Systems is now offering compensation for your referral efforts through the Friendly Systems Customer Referral Program. You can register names of other businesses that may be looking for a new software solution and earn a 5% referral fee when the sale closes! Once the sale closes, you will receive a **referral fee check for 5% of the selling price of the software**. Just send an email to free@friendlysystems.com with the contact information and your name and company and address and we will enter your name in our database and send you a check when the sale closes.

Check out our [website](#) to see what kind of software we offer.

Marketing Research Survey Underway

Friendly Systems has agreed to allow several Georgia State University Business School students to contact our customers to find out why they selected us as their business software provider. They will perform their survey over the next few weeks. Friendly will NOT be looking at the individual results.

We will be receiving a report that will identify areas where we need improvement and areas where we are doing well. This will assist us in doing an even better job of supporting your system with "Business Information that Works".

Give them a few minutes of your time, when they call, and help a student get an "A".

BusinessWorks Gold Version 5 Released by Best Software

There are many new features and benefits in Businessworks Gold version 5. Among them are the ability to

Simplified Installation of Upgrade:
No rebooting required.

Hide Inactive Records:
Version 5 allows you to have lookups and reports without those "inactive" GL accounts, Vendors, Customers or Inventory Items.

More Price Levels:
Version 5 allows up to 25 price levels, up from only 3. Finally, you can charge what you want for your products and services.

More BusinessWorks Gold News!
